1. First check your delivery content for Industryline...

Delivery content

LOCAL/CPU Unit MVX1
1 x MVX1i local (CPU)
without power supply
1 x Power Connector
1 x DVI - DVI cable 1,8m/5,9ft
1 x USB cable 1,8m/5,9ft
1 x VGA - DVI cable 1,8m/5,9ft (opt)
4 x rubber feet

REMOTE/CON Unit
1 x MVX1 remote (CON)
without power supply
1 x Power Connector
4 x rubber feet

2. Are your upgrades for INDUSTRYLINE are unlocked

upgrades for Industryline included

USB Memory
Analog VGA - transmitted as DVI (included in US)
Matrix Switching System up to 48 endpoints (included in US)

3. Than check your installation....

Quick Installation INDUSTRYLINE MVXi local / CPU – remote/ CON

1. Connect the CON / Remote and the CPU / Local Unit to the included 12V 1A power supply.
2. Now connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.
3. Connect the CPU / Local and the CON / Remote Unit with a network cable.
4. Now connect the HDMI-DVI cable to the DVI socket of the PC and the other end to the HDMI socket of the CPU / Local Unit (PC-in). Then connect the monitor with the HDMI-DVI cable to the CON / Remote Unit.

HAVE FUN - your kvm-tec Extender is now in use for many years (MTBF approx 10 years)
1. First check your delivery content ...

Delivery content

LOCAL/CPU Unit
1 x MVX 1i-F local (CPU)
Without power supply
1 x Power Connector
1 x DVI - DVI cable 1,8m / 5,9 ft
1 x USB cable 1,8m / 5,9 ft
1 x VGA - DVI cable 1,8m / 5,9 ft (opt)
1 x SFP Modul-Multimode up to 500m / 1640 ft
(alternativ with Single-Mode up to 20km / 12 mi)
4 x rubber pads

Remote (CON)
1 x MVX1-F remote (CON)
without Power supply unit
1 x Power Connection
1 x SFP Modul Multimode up to 500m/1640 ft.
(alternative with Single-Mode up to 20km/12 mi)
4 x rubber feet

for your FIBER Extender
4 x SFP Module-Multimode up to 500m/1640 ft.
alternative with Single-Mode up to 20km/12 mi-
ItemNr6831

2. Are your upgrades for Industryline fiber unlocked

to unlock upgrades, please send an email or give us a call. Please have your ID code ready. (you finde your ID in the OSD menu by pressing the button „M“ - Device ID
You’ll get a code from our support team.
Please, enter the code

upgrades for Industryline included

USB Memory
Analog VGA- transmitted as DVI (included in US)
Matrix Switching System up to 48 endpoints (included in US)

3. Than check your installation....

Quick Installation INDUSTRYLINE FIBER  local / CPU – remote/ CON

1. Connect the CON / Remote and the CPU / Local Unit to the included 12V 1A power supply.
2. Now connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.
3. Connect the CPU / Local and the CON / Remote Unit with a network cable.
4. Now connect the HDMI-DVI cable to the DVI socket of the PC and the other end to the HDMI socket of the CPU / Local Unit (PC-in). Then connect the monitor with the HDMI-DVI cable to the CON / Remote Unit.

HAVE FUN - your kvm-tec Extender is now in use for many years (MTBF approx 10 years)
4. Check the LEDS to get more information....

5. Your Extender....

- **No Power (No LED)**
  - Check the powerplug
  - Is the power supply ok? Try another Unit.
  - Try reprogramming the Unit by using a JTAG programmer
  - Contact kvm-tec support

- **USB is not working**
  - Are the USB Devices plugged in correctly?
  - Is the USB cable on the Local side plugged into the PC?
  - Are the USB Devices working directly on the PC?
  - Replace the USB cable from PC to the Local Extender
  - Check if local and remote Unit have the same firmware
  - Check if the local or the remote Unit is causing the problem by swapping first the local and than the remote Unit to another Unit
  - Contact kvm-tec support

- **No Video**
  - Check if all cables are plugged in correctly
  - Check if the PC is sending a Image by plugging in a monitor on the local out of the local Unit
  - Check if the DDC is set correctly (in menu under point „O“)
  - Check if both Units have the correct firmware
  - Contact kvm-tec support

- **Video error (stripes in the picture)**
  - Check if all cables are plugged in correctly
  - Check if the PC is sending a Image by plugging in a monitor on the local out of the local Unit
  - Check if the DDC is set correctly (in the menu under point „o“)
  - Check if both Units have the correct firmware
  - Contact kvm-tec support

We are here for you to answer your questions about installation?

Manual download www.kvm-tec.com or kvm-tec Installationchannel on our homepage personally +43 2253 81912 - 30
6. Check the firmware version ....

To view the firmware version
Make sure the main menu is open. The currently installed firmware version of the remote and local units are displayed (e.g. ‘4267’) and check that you have the same firmware on both units.

Ways to update the firmware version ....
There are four ways to perform an update:

1. update via a bitmap image
2. automatic update
3. network update

how to update the firmware version ....
To perform a firmware update:
1. Make sure the main menu is open.
2. Press the N key to do a network update.
3. Press the A key to do an automatic update.
4. Press the U key to do a direct update.
5. Press the S key to do a USB Update.

Update service with kvm-tec Switching Manager....
For all our devices of the SVX and MVX series we deliver a free demo version of the kvm-tec Switching Manager Software (Item No. 4004) for a comfortable update of all units in the switching system. For our devices of the MX and UVX series the Switching Manager is included.

This is a comfortable update management for your switching system.

You can update all extenders at the same time. The update is performed in the background and in a second step the units are rebooting with the new firmware.

Only a short time is needed for the second step.

ATTENTION ! Only when the bar is grey, the update is finished.

INDUSTRYLINE
smart connection

Checklist ....

- identify your extender
- first check your delivery content
- are all needed upgrades are unlocked
- all cables are connected and all units are switched on
- check the LED status
- Video - check if the DDC is set correctly (in menu under point „O“)
- USB - are all cables connected
- in case of issues check the firmware version (download for the newest firmware kvm-tec.com/support)

if everything is working fine - perfect

Tipps from our engineers for engineers

- reduce the setting of your system and set up only one local and one remote at the same place
- connect the monitor directly to the PC - does the monitor display an image? (follow the mentioned steps from above)
- LED status is red or blinking - this can be a cable problem - try to get a short patchcable and to connect the units and be sure that it’s not a cross - over cable
- USB problems with mouse and keyboard - please try a different type of mouse and keyboard

Further expert tipps for issues

- Adapter - our units are transmitting DVI signals. If you are using adapters try a PC with DVI signal
- PC - please try another machine
- If you have more sets please make a cross check and change of the units

Further steps

Please, fill out the support form and contact our support team  +43 2253 81912 - 30
**Support Form**

If the shoe pinches, then we are there for you!

**Support - request**

If the shoe pinches, then we are there for you!

To support your case as quickly as possible and to be able to process and track your data, we ask you to provide us with the following information.

After we have received your mail, a support ticket is automatically created in our ticket system, where all information about your support case is stored, and is traceable at any time.

This way the support team has all the information about your system in a direct conversation and your advantage is that the questions can be answered in a targeted and faster way.
