1. First check your delivery content

**MAXflex single fiber redundant** ....

**Delivery content**

**LOCAL/CPU Unit MX 2000 Copper**
1 x MA1-F local (CPU)
1 x wall power supply unit 12V 2A (EU-plug or INT. plug)
1 x DVI-DVI cable 1.8m/5.9ft
2 x SFP Module Multimode up to 500m/1640ft
alternativ with Single-Mode up to 20km/12mi (item no 6855)
4 x rubber feet

**REMOTE/CON Unit**
1 x MA-F remote (CON)
1 x wall power supply unit 12V 2A (EU-plug or INT. plug)
2 x SFP Module Multimode up to 500m/1640ft
alternativ with Single-Mode up to 20km/12mi
4 x rubber feet

---

2. All your upgrades for **MAXflex** are unlocked

**USB Memory**
- Analog VGA-transmitted as DVI
- RS232

**Sound analog in both directions as CD quality**
- Matrix Switching System up to 1000 endpoints

**Mouse Glide Switch**

---

3. Than check your installation....

![Quick Installation Diagram]

**Quick Installation MAXflex Single Fiber** local / CPU – remote / CON

1. Connect the CON / Remote and the CPU / Local Unit to the included 12V 2A power supply.
2. Now connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.
3. Connect the CPU / Local and the CON / Remote Unit with a network cable.
4. Now connect the DVI cable to the DVI socket of the PC and the other end to the DVI socket of the CPU / Local Unit (PC-in).
5. Connect PC audio/out with the audio cable to local audio/in. Connect audio/out via the audio cable.
6. Almost done! Connect the audio cable local audio/out to the PC audio/in and remote audio/out with audio cable to the microphone.
7. Using a switch: Connect all endpoints to the switch. Ensure that all connections have a bandwidth of 1 Gbit/sec. For video sharing the network has to support IGMP snooping.

5. Your Extender....

No Power (No LED)
- Check the powerplug
- Is the power supply ok? Try another Unit.
- Try reprogramming the Unit by using a JTAG programmer
- Contact kvm-tec support

USB is not working
- Are the USB Devices plugged in correctly?
- Is the USB cable on the Local side plugged into the PC?
- Are the USB Devices working directly on the PC?
- Replace the USB cable from PC to the Local Extender
- Check if local and remote Unit have the same firmware
- Check if the local or the remote Unit is causing the problem by swapping first the local and than the remote Unit to another Unit
- Contact kvm-tec support

No Video
- Check if all cables are plugged in correctly
- Check if the PC is sending an image by plugging in a monitor on the local out of the local Unit
- Check if the DDC is set correctly (in menu under point “O”)
- Check if both Units have the correct firmware
- Contact kvm-tec support

Video error (stripes in the picture)
- Check if all cables are plugged in correctly
- Check if the PC is sending a image by plugging in a monitor on the local out of the local Unit
- Check if the DDC is set correctly (in the menu under point „O“)
- Check if both Units have the correct firmware
- Contact kvm-tec support

Check if other Units have the same behaviour
- Check if the network switch is setup correctly and has enough bandwidth
- Contact kvm-tec support

Check if local and remote Unit have the correct firmware
- Check if local and remote Unit have the same behaviour
- Contact kvm-tec support

Check if the network switch is setup correctly and has enough bandwidth
- Check if other Units have the same behaviour
- Contact kvm-tec support

6. Check the firmware version ....

To view the firmware version
Make sure the **main menu** is open. The currently installed firmware version of the remote and local units are displayed (e.g. '4267') and check that you have the same firmware on both units.

Ways to update the firmware version ....
There are four ways to perform an update:

- **UBS stick update**

  **how to update the firmware**
  
  **To perform a firmware update**
  
  Make sure that the main menu is open.
  
  Press U to update the USB flash drive.

  **Update Service with kvm-tec Switching Manager Demoversion ....**

  This is a comfortable update management for your switching system.
  
  You can update all extenders at the same time. The update is performed in the background and in a second step the units are rebooting with the new firmware.
  
  Only a short time is needed for the second step.

  **ATTENTION**! Only when the bar is grey, the update is finished.
Checklist ....

- identify your extender
- first check your delivery content
- are all needed upgrades are unlocked
- all cables are connected and all units are switched on
- check the LED status
- Video - check if the DDC is set correctly (in menu under point „O“)
- USB - are all cables connected
- in case of issues check the firmware version (download for the newest firmware kvm-tec.com/support)

If everything is working fine - perfect

Tipps from our engineers for engineers

- reduce the setting of your system and set up only one local and one remote at the same place
- connect the monitor directly to the PC - does the monitor display an image? (follow the mentioned steps from above)
- LED status is red or blinking - this can be a cable problem - try to get a short patchcable and to connect the units and be sure that it’s not a cross-over cable
- USB problems with mouse and keyboard - please try a different type of mouse and keyboard

Further expert tipps for issues

- Adapter - our units are transmitting DVI signals. If you are using adapters try a PC with DVI signal
- PC - please try another machine
- If you have more sets please make a cross check and change of the units

Further steps

Please, fill out the support form and contact our support team  +43 2253 81912 - 30

If the shoe pinches, then we are there for you!

To support your case as quickly as possible and to be able to process and track your data, we ask you to provide us with the following information.

After we have received your mail, a support ticket is automatically created in our ticket system, where all information about your support case is stored and are traceable at any time.

This way the support team has all the information about your system in a direct conversation and your advantage is that the questions can be answered in a targeted and faster way.
