kvm-tec4 future

flexible customized
the Productline FLEXline, media4Kconnect and 4K Ultraline are compatible in the Matrix Switching system and with the kvm-tec Gateway and Gateway2go access to virtual machines or Live pics from the Switching System are possible

future proofed
The Matrix Switching System can be extended at any time by upgrade packages for endpoints and guarantees a super fast switching up to 2000 endpoints

secure engineered
redundant for secure critical operations and uncompressed transmission without artefacts, non hackable - based on a unique and proprietary protocol - KVM system runs on a VLAN or a separate switch. This means a dedicated Networkmanagement

Hardware optimized
Software features Mouse glide & Switch, 4K Multiview Commander flexible & scalable USB, Video and Sound Channel managing 4 single or 4 dual FLEXline Extender in 1 RU – saves space in the rack

High performance KVM Solutions and Matrix Switching Systems up to 2000 endpoints

and the best - kvm-tec solutions convince by a sensational price-performance ratio and are produced in Europe
Congratulations on the purchase of your new Smartline SVX1 KVM Extender. You have bought a high quality extender. These instructions are part of this product. They contain important information regarding safety, use and disposal for every user of the Smartline SVX1 KVM Extender. Please familiarise yourself with the information within prior to using your product. Use the product only in the manner as described and for the areas of application as stated. When passing the product to a third party be sure to also supply all instructions and other relevant documentation. Following proper use and maintenance, your Smartline SVX1 KVM Extender will bring you joy for many years to come.

1.1 INTENDED USE

This product is intended to be used as a device to increase the distance that a keyboard, monitor and mouse can be placed from a computer. This product is intended for professional use. The product should not be used in potentially explosive environments.

The product may only be used according to the instructions as described in this manual. All use, other than that described in this manual, is seen as unintended use. Modifications in the course of technological progress are reserved. In these user instructions the Smartline SVX1 KVM Extender is referred to as ‘product’ or ‘extender’. The SVX1/PC is referred to as the ‘local unit / CPU and the SVX1/Monitor is referred to as the ‘remote unit’/CON.

1.2 SAFETY INSTRUCTIONS

WARNING! Read and understand all safety instructions.

• Follow all the instructions. This will avoid accidents, fire, explosions, electric shocks or other hazards that may result in damage to property and/or severe or fatal injuries. Please ensure that everyone who uses the product has read and followed these warnings and instructions.
• Keep all safety information and instructions for future reference and pass them on to subsequent users of the product.
• The manufacturer is not liable for cases of material damage or personal injury caused by incorrect handling or non-compliance with the safety instructions. In such cases, the warranty will be voided.
• This product is not intended for use by persons (including children) with restricted physical, sensory or intellectual capability or lack of experience and/or knowledge, unless they are supervised by a person who is responsible for their safety or provides them with instructions on how to use the product.
• DANGER! Not for use in potentially explosive environments.
• DANGER! Be vigilant at all times, and always take care around this product. Do not use electrical equipment if you are lacking in concentration or awareness, or are under the influence of drugs, alcohol or medication. Even a moment of inattentiveness can lead to serious accidents and injuries when using electrical equipment. Check the product and the cables for any damage before use. If there is any visible damage, a strong odour, or excessive overheating of components unplug all the connections immediately and stop using the product.
• If the product is not installed and used in accordance with this manual, it may cause disruptive interference with radio or television reception or affect other electronic products in residential areas.
• Use shielded cables only to connect the components in order to avoid such interference. Non-compliance invalidates the permission to operate this product.
• Only the mains adapter included with the product should be used as the power supply. Do not use other adapters.
• Prior to connecting to the mains, make sure your local mains voltage matches the rating indicated on the product.
• The product must be connected to a permanent and earthed AC wall socket.
• Protect cables from being strained, pinched or buckled and place them in a way to prevent people from tripping over the cord.
1. INTRODUCTION

- In particular, ensure to avoid damage to the mains adapter.
- Use the product with a suitable, properly installed and easily accessible mains power socket. Make sure the product can be disconnected from the power socket at all times.
- Unplug the product during electrical storms or when not in use.
- DANGER! Never touch the adapter with wet hands.
- Use the product within the specified performance limits.
- Keep the product away from flammable materials such as curtains and drapes.
- Protect the mains adapter from use by third parties (particularly children). Keep the unused mains adapter in a dry, elevated or locked location away from children.
- Do not place the product near heaters.
- Do not drop or hit the product.
- Unplug all connections before cleaning the product. Do not use wipes or chemicals as these could damage the surface. Wipe the housing with a damp cloth. Electrical/ electronic parts must not be cleaned.
- Alterations to the product and technical modifications are not permitted.

1.3 TECHNICAL SPECIFICATIONS

Type: KVM Extender (local/CPU unit and remote/CON unit)
Model: Smartline SVX1 KVM Extender
Power supply input voltage: 100 - 240 V; 50/60 Hz AC
Power supply output: 12V; 2A (external power supply)
Power requirement: 6W per extender (excluding attached USB devices)
Operating temperature range: 0 ºC to 45 ºC / 32 °F to 113 °F
Storage temperature range: −25 ºC to 80 ºC / −13 °F to 176 °F
Relative humidity: max. 80% (non-condensing)
Storage humidity: max. 80% (non-condensing)
Casing Material: Anodized aluminum
Dimensions: approx. 97,5 x 41 x 103,5 mm / 3.83 x 1.57 x 4.07”
Weight:
Local 302g/0.60lbs Remote 291g/0.64 lbs
Shipment weight Set 1,45kg / 3.19 lbs
Expected product life: 82 820 hours / 9.5 years

2.1 UNPACKING AND CHECKING THE CONTENTS

Before using the product for the first time it should be checked for damage. In case of damage due to transport inform the carrier immediately. Before delivery the product is checked for its function and its operating safety.

Make sure that the packaging contains the following content:

**Local/CPU Unit**
- 1x SVX1 local/CPU extender
- 1 x Power supply 12V; 2A EU plug or INT plug
- 1 x DVI-HDMI cable 1,8m / 5.9ft
- 1 x USB cable 1,8m/5.9ft
- 4 x Mounting Pads

**Remote/CON Unit**
- 1x SVX1 remote/CON extender
- 1 x Power supply 12V; 2A EU plug or INT plug
- 1 x DVI-HDMI cable 1,8m / 5.9ft
- 4 x Mounting Pads
2. INSTALLATION OF THE EXTENDER

2.2 MOUNTING OPTIONS

2.2.1 MOUNTING PADS AND RUBBER FEET

The mounting pads and rubber feet can be used to hold the extenders in place and prevents them from sliding and falling.

To attach the mounting pads or rubber feet:
1. Remove the protection layer from the mounting pads or rubber feet (G).
2. Attach the mounting pads or rubber feet (G) to the bottom the units.

2.2.2 MOUNTING KITS (OPTIONAL)

The following mounting kits are available:

- **Rack Mounting Kit RMK-F - Part No. 6130**
  The rack mounting kit RMK-F is for assembling kvm-tec Smartline SVX and Masterline MVX extenders. It consists of 19" rack shelf and an alu-faceplate.

- **Rack Mounting Kit RMK-FN - Part No. 6131**
  The rack mounting kit RMK-FN is for assembling kvm-tec Smartline SVX and Masterline MVX extenders. It consists of 19" Rack Shelf, alu-faceplate and power supply.

- **Rack Mounting Kit RMK-FRN - Part No. 6132**
  The rack mounting kit RMK-FRN is used to mount kvm-tec Smartline SVX and Masterline MVX extenders. It is equipped with rack shelf, faceplate and 2 power supply units, which are summarized in a redundancy module.

- **Under Desk Mounting Kit - Part No. 6937**
  The Under Desk Mounting kit is for underdesk mounting of the SVX and MVX extender.

- **DIN Rail Mounting Kit - Part No. 6136**
  The DIN rail mounting is used for space-saving installation in control cabinets or on DIN rails. The attachment to the SVX and MVX extenders is possible in several ways.

2.3 INSTALLING THE EXTENDER

WARNING! Read and understand all safety information before installing the product.

The units can be set up to access one host computer, or to access numerous host computers. In the case of the latter, an additional Network Switch must be installed. With a Network Switch, each user can gain quick access to any of the required computers.
Quick Installation SVX1 SMARTLINE

local / CPU - remote/ CON

Connect the CON / Remote and the CPU / Local Unit to the included 12V 2A power supply.

Connect the USB cable to a USB port on your PC and connect the other end of the USB cable to the CPU / Local Unit. Connect keyboard and mouse to the CON / Remote Unit.

Connect the CPU / Local and the CON / Remote Unit with a network cable.

Connect the HDMI- DVI cable to the DVI socket of the PC and the other end to the HDMI socket of the CPU / Local Unit (PC-in). Then connect the monitor with the HDMI-DVI cable to the CON / Remote Unit.

HAVE FUN - your kvm-tec Extender is now in use for many years ( MTBF approx 10 years)
2. INSTALLATION OF THE EXTENDER

2.4 START UP

To start up the system without switch:
1. Make sure that the two monitors and the computer are switched on.
2. If you are using a Network Switch, connect the power supply to an earthed wall socket.
3. Connect both extender power supplies (C) to an earthed wall socket. Both extenders will start an initialisation process. The red status LED blinks a few seconds. After a few seconds the status LED lights green. The monitor will displays your computer’s desktop or any open applications.

2.5 REMOVING A CATX CABLE

To remove a CATx cable:
• Press the latch down and slowly pull the cable out.

2.6 BEST PRACTICE FOR WINDOWS 10

Disable USB Energy Savings in Windows 10

![Image of Control Panel]

- Control Panel
- Settings
- Windows Administrative Tools
- Device Manager
- Mouse
2. INSTALLATION OF THE EXTENDER
3. EXTENDER MENU/SETTINGS

3.1 HOW TO ACCESS THE MAIN MENU

Use the monitor and keyboard to get access to the main menu.

To access the main menu:
1. Make sure the extenders, the monitors and the computer are switched on.
2. Press the Scroll Lock key on your keyboard quickly five times. The main menu appears with an overview of the sub-menus.
3. To access a sub-menu press the applicable key.

3.2 SYSTEM STATUS

In the “Status Menu” the current status of the extender connection is displayed. It provides information on the connection itself as well as resolution of the video channel, and USB-status.

The enabled options and the current FW-version is displayed in the left top corner.
Link status shows whether there is a physical connection available. Connection indicates if kvm data is currently able to be transmitted.
Video and USB show if data is currently being transmitted.
3. EXTENDER MENU/SETTINGS

3.3 VIEWING THE CURRENT FIRMWARE VERSION

The currently installed firmware versions of the remote and local units are displayed below (e.g. '4267')

---

3.4 UPDATING A FIRMWARE

You have 3 possibilities for an update:
1. Update with Bimap Image
2. Automatic update
3. Network update

To perform a firmware update:
1. Make sure the main menu is open.
2. Press the U key. The Update menu appears.
   - Press the N key to do a network update.
   - Press the A key to do an automatic update.
   - Press the U key to do a direct update.
   - Press the Q key to return to the main menu.
3. EXTENDER MENU/SETTINGS

3.4.1 UPDATING WITH BITMAP IMAGE

The file is output from an image and saved in the currently connected extenders.

Wait until all 3 phases of the update have been completed and make sure that you do not disconnect or plug in the devices during the update.

3.4.2 PERFORMING AN AUTOUPDATE

You can set in the menu which part should be updated.
As soon as the devices are connected, the firmware is copied from one unit to the other.

The flashing of the light emitting diodes indicates when the update process is finished (the light emitting diodes are then green)
3.4.3 PERFORMING A NETWORK UPDATE

In the network update the devices that are updated can be marked.

The information is then sent to the marked units. During this process the devices can still be in operation. As soon as all updates have been transmitted, the marked devices can be restarted and start with the new firmware.

3.5 UNLOCK AN UPGRADE

1. Make sure the main menu is open.
2. Press the M key, The Options Overview menu opens. The device ID will be shown.
3. Order the unlock code from your supplier by providing them with the 9-character device ID and the serial number of your KVM-extender.
4. Press M key to enter the unlock code.
5. Enter the unlock code your supplier provided.
6. The extender will automatically restart.
7. To confirm the upgrade has been unlocked return to the Options Overview menu and check that the relevant upgrade is now displayed in green.
3. EXTENDER MENU/SETTINGS

3.6 ENABLE OR DISABLE USB MEMORY UPGRADE

The USB Memory upgrade allows the user to enable or disable the memory upgrade. When the USB Memory upgrade is enabled, USB flash storage and external storage devices can be accessed via the extender. If your extender was provided with the USB Memory upgrade you can enable and disable at any time.

1. Make sure the main menu is open.
2. Press the M key. The Options Overview menu opens. The current USB Memory status is displayed (Enabled or Disabled).
3. Press 1 to enable or 0 to disable the USB Memory upgrade.

3.7 DEFINING WHAT DDC DATA YOUR PC USES

In the DDC Information menu, the user can define which DDC information is used by the PC.

Definition of the DDC information used in the PC:
1. make sure that the main menu is opened.
2. Press the O button and the DDC Option Menu will be displayed.
3. Press 0 to display the DDC information of the monitor connected to the Remote (CON) Extender is connected to the unit.
4. Press 2 to save the current DDC information. The system is not applies the same settings after restarting the Extender
5. Press the buttons 4 to 8 to use a predefined resolution, the is stored in the memory.
6. Press ESC to return to the main menu.

3.8 CHANGING THE NETWORK SETTINGS

see chapter „Switching Menu settings“.
3.9 CHANGING EXTENDER SETTINGS

The Extender Settings menu allows the user to change a range of further preferences, which can be enabled or disabled by pressing the applicable key.

To access the Extender Settings menu:
1. Make sure the main menu is open.
2. Press the G key. The Extender Settings menu appears.
3. The extender settings are distributed across two sub-menus: Remote Settings and Local Settings.

4. View the local or remote Extender settings:
   • Press the L button to display the Local Setting menu.
   • Press the R button to display the Remote Settings menu.
3.9.1 CHANGING THE USB COMPATIBILITY MODE

To enable/disable the USB compatibility mode:
1. From the Extender Settings menu, press the L key. The Local Settings menu appears.
2. Press the U key to enable or disable the USB compatibility mode.

3.9.2 SHOW LAST RECEIVED IMAGE

This function lets you show the last image that is received instead of a black screen when the monitor extender is disconnected from the PC extender. To show that it is the last image received, the edges of the screen flash red.

To enable or disable the Last Image Received function:
1. From the Extender Settings menu, press the R key. The Remote Settings menu appears.
2. Press the S key to enable or disable the function.
3. Press ESC to go back to the main menu.
3.9.3 TURNING ON OR OFF MONITOR SYNCHRONIZATION

The monitor synchronization can be turned on and off. When enabled, the refresh rate of the
graphics card of the PC and that of the remote monitor are adjusted to match one another.
The advantage of this is to ensure that transmission remains smooth when the screen content
changes rapidly (e.g. When using multimedia applications). Not all monitors support this method
so by default this option is disabled.

To turn on monitor synchronization:
1. From the Extender Settings menu, press the R key. The Remote Settings menu appears.
2. Press the I key to enable or disable the function.
3. Press ESC to go back to the main menu.

3.9.4 LOCKING MAIN MENU

The extender menu can be locked. When enabled, the extender locks 5 minutes after start up
to prevent unauthorized access.

To lock or unlock the menu:
1. From the Extender Settings menu, press the R key. The Remote Settings menu appears.
2. Press the L key. The Menu Lock Menu appears.
3. EXTENDER MENU/SETTINGS

3.9.5 USING THE POWER SAVING MODE

The power saving mode lets the extender turn off its video out when the remote extender does not receive a video signal for more than a minute.

To turn on or off the power saving mode:
1. From the Extender Settings menu, press the R key. The Remote Settings menu appears.
2. Press the P key to enable or disable the power saving mode.
3. When in power saving mode, press any key to return to the menu.

3.9.6 SELECTING A KEYBOARD LAYOUT

The Keyboard Locale menu lets you switch between keyboard layouts for navigating the on screen display menu (OSD). You can choose between French (Azerty), English (Qwerty) and German (Qwertz).

To select a keyboard layout:
1. From the Extender Settings menu, press the R key. The Remote Settings menu appears.
2. Press the K key. The Keyboard Locale menu opens:
   - Press E to select English (QWERTY)
   - Press D to select German (QWERTZ)
   - Press F to select French (AZERTY)
3. EXTENDER MENU/SETTINGS

3.9.7 CHANGING THE KEYBOARD FALBACK MODE

Press the R key. The Remote Settings menu appears.
2. Press the O key to change the keyboard fallback mode to 0, 1 or 2.

3.9.8 EDITING KEYBOARD SHORTCUTS

The Keyboard Shortcuts menu lets you edit the preferred shortcuts for common commands.

To edit the shortcuts:
1. From the Extender Settings menu, press the R key. The Remote Settings menu appears.
2. Press the H key. The Keyboard Shortcuts menu opens.
3. Use the arrows to select a command.
4. Press E to edit the shortcut.
   To edit:
   • Press a single key. Edit the frequency with left and right arrows.
     - OR -
   • Press a key combination

3.9.9 CLOSING EXTENDER SETTINGS MENU

To close the Extender Settings menu:
• Press Q to close the Extender Settings menu.
3. EXTENDER MENU/SETTINGS

3.10 SWITCHING BETWEEN DIFFERENT COMPUTERS

The menu for switching between different computers is accessible via a USB keyboard connected to the remote unit.

1. Press Ctrl+Alt+F12 (this is the default keyboard shortcut but may be changed. See “How to change keyboard shortcuts”). The switching menu opens. The switching menu lists all the local units connected to the switching network.
   • Blue indicates the computer with which you are currently connected. The status is listed as “conn’d”.
   • White indicates a computer which is currently connected to by another work station (Remote unit). The status is listed as “in use”.
   • Green indicates a computer in the switching network that isn’t connected to any work station (Remote unit). The status is listed as “free”.
   • Red indicates a computer which was once in the switching network but isn’t currently available. This usually indicates that the Extender has been disconnected from the network. If this is the case the computer can be removed from the switching menu with the “delete” key.

2. Use the arrow up and arrow down keys, or PGUP and PGDOWN keys, to select a local extender. Press enter. The system switches to the selected computer.
   • The left column defines the favourites menu and provides each computer with a favourite number. Each favourite number corresponds to a hot-key combination that can be used to quickly connect to the desired computer without having to access the switching menu. For example favourite “1” has the hot-key combination “Ctrl+Alt+F1” For favourite “2” this is “Ctrl+Alt+F2” and so on up to favourite “8” with “Ctrl+Alt+F8”. All other computers can still be accessed via the switching menu. To change the order of the computers in this list, select the computer then press a number key 1 through 8 to shift it to that number.
   • If the password system is active, the user currently logged in is displayed at the bottom. You can manually logout by pressing the “x” key or disconnect from the current PC by pressing the „d” key.

3.11 SHARING VIDEOS

The Video Sharing option allows you to share your screen with other users on the network. Ensure that the switch you are using has IGMP Snooping capabilities, and that this is turned on (most switches have this off by default).

What happens with the control over the local extender depends on the initial state. There are two main use-cases which can both be controlled in the MASTER VIEW connections overview menu. Note that this capability is not available in combination with the password security system.

To share a video:
1. Make sure the main menu is open.
3. Choose one of the following:
   • To mirror a screen to other consoles:
     • Press the P key on the keyboard of the extender that should display the user’s screen. In this case „P” stands for „push to screen”. Such a command is only valid if the console which initiates the mirroring is currently connected to a local unit and has video and the other remote unit is “free” (marked green).
   • To see the screen of other consoles on the network:
     • Press the G key on the keyboard of the extender that should display the user’s screen. The key „G” stands for „get screen”. If the console unit from which this command is executed currently has a partner, a disconnect is executed before the video of the other local unit is displayed. If the selected local extender currently isn’t connected, a regular connection including USB, etc. is established.
4. NETWORK SETTINGS

3. EXTENDER MENU/SETTINGS

4.1 ACCESS TO NETWORK SETTINGS MENU (MASTER VIEW AND NETWORK MODE)

The Network Settings menu includes the preferences and settings for the Switching Option. Note: this menu is only available when the Switching Option has been unlocked (see chapter “How to unlock an Option”).

To access the Network Settings menu (Master View and Network Mode):
1. Make sure the main menu is open (see chapter “How to access the main menu”)
2. Press the W key. The Enter User/Password window opens.

3. Log in with your user name and password. The Network Setting menu opens. Note: in order to prevent unauthorised access to the Network Settings, this option is protected by a user/password combination. Access is only allowed for users with administrator rights. The factory settings provide an administrator user with User: admin and Password: admin.
   • The Master View option allows the administrator to view, add, edit or remove user, console and computer information. Press the V key to access the Master View menu.
   • The Network Mode allows to define how you want the network system to operate. Each of the modes available may individually be activated or deactivated by pressing the appropriate key. You may have more than one selected depending on their function. Some modes require others, and others are incompatible with each other, but the system will automatically recognise this for you. Press the M key to access the Network Mode menu.
4. NETWORK SETTINGS

4.2 DISCONNECT OR SELECT A WORKSTATION FROM THE CURRENT CONNECTED DEVICES

The Connection Overview provides an overview of the current connections as well as the free PCs and consoles on the network. You may break a connection remotely, or assign a PC a new console or vice versa.

1. Make sure the Master View menu is open (see chapter „How to access the Network Settings menu (Master View and Network Mode)“).

2. Press the O key. The Connection Overview menu opens.

3. Press the I key. The Connection Details window opens.
   - Press the D key to force disconnect the selected device/connection.
   - Press the E key or Enter key to select a PC or workstation to create or break a connection to that unit.
   - Press the Q key to exit.
4.3 MANAGING USER DETAILS RIGHTS AND GROUPS

The Console Extender List allows you to manage user details, rights and groups.

1. Make sure the Master View menu is open (see chapter „How to access the Network Settings menu (Master View and Network Mode)“).

2. Press the U key. The User List menu opens.
   - Press the A key to add a new user.
   - Press the R key to delete the selected user.
   - Press the I key to display details about the selected user which may be edited.
4. NETWORK SETTINGS

2. Press the U key. The User List menu opens.
   • Press the A key to add a new user.
   • Press the R key to delete the selected user.
   • Press the I key to display details about the selected user which may be edited.

3. To edit a user, press the I key. The User Detail menu opens.
4. Select the user detail you want to edit and press the E key.
   • User: Assign each user a login name with max. 12 characters.
   • Full Name: For clarity the full name of a user may be entered with max. 20 characters. This name is displayed when informing other users who interrupted their connection.
   • Password: Each user requires a password for the login. Max. 16 characters.
   • Rights: There are three types of rights: USER, MASTER and ADMIN.
     By pressing the + key the rights of the selected user can be changed. The rights control access to the Network Settings menu (only ADMIN), and which users may interrupt the connection of which other users.
     • Admin: May interrupt connections of Masters and Users. In the case that an Admin interrupts the connection of another Admin, the interrupted Admin may reclaim the original connection. Private connections can't be interrupted.
     • Master: May interrupt connections of Users. In the case that a Master interrupts the connection of another Master, the interrupted Master may reclaim the original connection. Admins and private connections can't be interrupted.

4.4 MANAGING THE REMOTE UNITS

The Console Extender List allows you to view all remote units in the switching network and their current status.

1. Make sure the Master View menu is open (see chapter „How to access the Network Settings menu (Master View and Network Mode)“).
2. Press the C key. The Console Extender List menu opens.
   - “this” defines the extender which you are currently using.
   - “in use” indicates that the extender is in use.
   - “free” indicates that this extender is not busy.

3. To edit the name of an extender, press the I key. The Console Extender Detail menu opens.
4. Press the E key to edit the name of the extender.

4.5 MANAGING LOCAL UNITS

The PC Extender list allows you to view all local units in the switching network and their current status.

1. Make sure that the Master View menu is open (see chapter „Network Settings - Master and Network Mode”).

2. Press the P key to open the PC Extender List (CPU) menu.
To edit the name, groups or status of an extender, press the I key. The PC Extender Detail menu opens.

4. Use the Up and Down Arrow keys to select the name or group of the PC unit.

5. Press the E key to edit the selected parameter.

Example:
There are the following 3 PC’s: Department PC, Team A PC and Team B PC. The users Alex, Blair and Charlie should have access to the Department PC and the Team A PC. The users Danny, Em and Frankie should have access to the Department PC and the Team B PC.

To achieve this we assign each PC a different group:
Department PC: Group 1
Team A PC: Group 2
Team B PC: Group 3

Alex, Blair and Charlie are assigned to be members of Group 1 and Group 2. Danny, Em and Frankie are assigned to be members of Group 1 and Group 3.

4.6 INSTALLING DUAL-HEAD OR MULTI-HEAD SYSTEM

If you are using multiple monitors with one PC, you can combine individual local/CPU and remote/CON units in the multi-head menu so that they can be switched as one unit.

Individual grouping of local (CPU) and remote (CON) extenders:
1. Make sure that the Master View menu is open (see chapter „Network - Networking“).
   Settings - „Master View and Network Mode“
4. NETWORK SETTINGS

3. Press the A key. The multi-head detail menu opens.
   • Press the R key to remove an extender from the multi-head set.
   • Press the Q key to exit.

4. Press the A key to add individual extenders. The extender type is automatically determined once the first extender has been selected.
5. Press the E key to edit the multi-head set name of max. 16 characters.

4.7 ENABLE USER GROUPS AND RIGHTS AND LOGIN ACCESS

The Passwords option allows to activate user groups and rights and login access. For more information about user groups and rights see „How to manage user details, rights and groups”.

Access to the network settings is always protected by a login and password, even when the password system is disabled.

To enable the password option:
1. Make sure the Network Mode menu is open (see chapter „How to access the Network Settings menu (Master View and Network Mode”)).
2. Press the P key to disable or enable the option.
4. NETWORK SETTINGS

4.8 AUTO-CONNECT TO A FREE COMPUTER AFTER AN INTERRUPTION

The Auto Connect option allows you to connect automatically with a free computer if your connection is interrupted by another user. This function is unavailable while using the Password System.

To enable the auto-connect option:
1. Make sure the Network Mode menu is open (see chapter „How to access the switching menu Master View and Network Mode“).
2. Press the C key to disable or enable the option.

4.9 INSTALLING A PRIVATE CONNECTION

With the Auto Connect option, you can establish a „private connection“ with your PC, which can be accessed by cannot be interrupted by other users.

**Activate a private connection:**
1. Make sure that the Network Mode menu is open (see chapter „Switches“). Menu Master View and Network Mode“).
2. Press V to enable or disable the option.
3. To establish a private connection, hold down the Shift key while selecting a new connection (you can either press 4 or press a key combination) - see chapter - „Switching between two PCs“.

![NETWORK SETTINGS > modes](image1)

![NETWORK SETTINGS > modes](image2)
4. NETWORK SETTINGS

4.10 ENABLE THE USER-PC BINDING MODE

1. Make sure the Network Mode menu is open (see chapter „How to access the switching menu Master View and Network Mode“).
2. Press the B key to disable or enable the option.

4.11 ENABLE THE DISCONNECT ON PC POWER DOWN OPTION

The Auto Connect option allows you to break the connection of any local unit that is connected to a PC that is powered down, allowing the remote unit to find a different local extender to connect to.

To enable the PC Power Down option:
1. Make sure the Network Mode menu is open (see chapter „How to access the switching menu Master View and Network Mode“).
2. Press the D key to disable or enable the option.
4. NETWORK SETTINGS

4.12 HIDDING SYSTEM STATUS MENU

1. Make sure the Network Mode menu is open (see chapter „How to access the switching menu Master View and Network Mode”).
2. Press the H key to disable or enable the option.

4.13 RECONNECT ON STARTUP

1. Make sure the Network Mode menu is open (see chapter „How to access the switching menu Master View and Network Mode”).
2. Press the T key to disable or enable the option.
4. NETWORK SETTINGS

### 4.14 SET THE PASSWORD TIMEOUT

When the password system is activated you can define under what circumstances the user will be required to re-enter their login details when switching.

- **I** – Immediately: User and password must be re-entered for each switch.
- **N** – Never: User and password are not required to be re-entered until the current user logs out. See chapter „How to switch between different computers‟.
- **T** – Time in min: You define the number of minutes since the last switch before the user and password details are required again to switch.

6. REQUIREMENTS FOR CABLES

6.1 REQUIREMENTS FOR CAT5E/6/7 CABLES

A Cat5e/6/7 cable should meet the following requirements:

- The pins are connected 1:1. Caution: the cable pairs must be twisted to EIA/TIA-568A (rare) or EIA/TIA-568B (common) pairs.
- Erroneous assignments cannot be found with a simple cable tester.
- The pins for the green pair of wires are not adjacent to one other.
- The cable must at the very least meet the CAT5 specifications and be suitable for Gigabit transmission.
- The cable should meet one of the following standards: Class D ISO/IEC 11801:2002 or EN 50173-1:2002. Schema EIA/TIA-568 B.
- Only use shielded installation cable with min. cross section of 24 AWG throughout the length.
- The shield should be contiguous and connected to both ends. A shielded patch cable is allowed for connection to the device.

Schema EIA/TIA-568 B

7. REQUIREMENTS NETWORK

The entire switching network system requires its own separate network. For security reasons, it cannot be integrated into an existing corporate network.

The network switch must meet the following specifications:
- 1 Gigabit switch, with a port-to-port transfer rate of 1 Gigabit/second.
- The following switches have all been tested and verified to work with all kvm-tec extenders.

Network requirements Matrix System UDP Version

The KVM-TEC Matrix Switching System communicates via IP between the individual endpoints (local/CPU or remote/CON), as well as with the KVM-TEC Switching Manager, Gateway2Go and API. Sharing of videos is realized via the IGMP function of the switch via multicast.

Each endpoint joins a multicast group, even if only one connection is established. This process is repeated cyclically so that the switch keeps the multicast group active.

One exception is the Gateway2Go, which uses unicast and communicates via UDP just like the other devices.

The following UDP ports are required for the transmission:
- Port Number 53248 (0xD000) to 53260 (0xD00C)
- Port Number 50000 (0xC350)

These ports must be taken into account when configuring the firewall. For the connection via WAN a secured VPN connection is necessary.

The KVM-TEC Matrix system supports DHCP management of IP addresses, static IP addresses are possible, internal default address range and assignment of IP addresses via a DHCP server. To meet all these requirements, the use of Layer 3 switches is recommended.

7.1 RECOMMENDED SWITCHES

An up-to-date list of all recommended switches can be found on our website under Switching System - Recommended Switches.
8. MAINTANCE & CARE, DISPOSAL

CAUTION! Do not use solvent-containing cleansers. Do not use wipes, alcohols (e.g. spiritus) or chemicals as these could damage the surface.

To clean the product:
  • Clean the product with a maintenance product for synthetic material, which is available in specialized shops.

This symbol on the product, the accessories or packaging indicates that this product must not be treated as unsorted municipal waste, but must be collected separately! Dispose of the product via a collection point for the recycling of waste electrical and electronic equipment within the EU and in other European countries that operate separate collection systems for waste electrical and electronic equipment.

By disposing of the product in the proper manner, you help to avoid possible hazards for the environment and public health that could otherwise be caused by improper treatment of waste equipment. The recycling of materials contributes to the conservation of natural resources. Therefore do not dispose of your old electrical and electronic equipment with the unsorted municipal waste.

The packaging is made of environmentally friendly materials, which may be disposed through your local recycling facilities. By disposing of the packaging and packaging waste in the proper manner, you help to avoid possible hazards for the environment and public health.

9. WARRANTY & EXTENDED WARRANTY

Warranty lasts 24 months from the date of purchase. The defect product has to be sent back to the manufacturer or your supplier within 2 weeks. The warranty becomes void in case of:

• External forceful impact
• Inappropriate maintenance
• Violating the operating instructions
• Damage by lightning

Always contact us first before sending back the product.

2 years standard warranty

Part nr 9003 Warranty extension to 5 years per UNIT
Part nr 9002 Warranty extension to 5 years per SET
If you have any questions about our products, please contact kvm-tec or your dealer.
